Bedford City Utilities

Samuel J. Craig, Mayor
Misty D. Adams, Utilities Director

May 8, 2020

If you have been out or live in the north end of town you have noticed an influx of trucks, grinding of pavement, a few road closures and restrictions from parking on the roads listed below. Paving will begin on Monday morning May 11th and will finish up Tuesday afternoon May 12th on the following areas. On P Street from Lincoln Avenue & 4th Street to the alley between 1st and 2nd Street, the east side of 4th Street from Lincoln Avenue to L Street and M street from 7th Street north to Peerless Road. Your trash and compost totes will be picked up as normal but could be earlier or later than usual so your totes must be out before 6 AM on Monday. This paving is the first group to get done. The crew will then be back around May 18th for more areas again dependent on weather. Please be patient and avoid this area if you can go around another way on these days. Of course, weather is always a factor, so this schedule is tentative, but it looks promising for those days. We want the Contractor's employees and the public safe. Watch for temporary road closures and go slow. We want to thank all the residences and businesses for their patience during the storm water construction project. We are on the home stretch with the completion of the paving. Mayor Craig is still working with contractors to resolve paving concerns on Lincoln Avenue from 5th Street to 1st Street. Please contact the utilities department at 812-275-1626 or the street department at 812-279-9222 if you have questions or concerns.
